## SHADY OAK ROAD CONSTRUCTION UPDATE

### Shady Oak Road construction began Monday, Oct. 29.

Initial construction activities include **relocating private utilities** - including gas, electric and communications lines - which are buried in the boulevard area. In addition, the contractor will **remove trees** which will be impacted by the widening of the roadway and will also **grade boulevard areas**. The tree removal and grading work will allow the utility relocation to proceed which is a very important initial step in the roadway reconstruction.

**Soil corrections** between City West Parkway and West 62nd Street will also occur this fall. This work will include excavating and removing poor quality soils from beneath the roadway and replacing them with higher quality materials.

These construction activities will not impact the existing roadway, but will require some **temporary lane closures** to protect construction workers. **Northbound Shady Oak Road will be reduced to one lane for 2 to 3 weeks**. In addition, there will likely be periodic daytime lane closures for both northbound and southbound Shady Oak Road.
