-  **Anonymous user's Opinion**
A household member tested positive for COVID-19 but has recovered. No other household member showed any symptoms.
-  **Anonymous user's Opinion**
We are just feeling the isolation. Even outdoor gatherings in small groups would help so much
-  **Anonymous user's Opinion**
none
-  **Anonymous user's Opinion**
Worrying about how others in Eden Prairie are respecting (or not respecting) social distancing guidelines
-  **Anonymous user's Opinion**
None
-  **Anonymous user's Opinion**
I have a daughter who lives in Chicago and had to cancel plans for her to visit for Spring Break and summer is in question. That is concerning but we are all dealing with this new reality pretty well.
-  **Anonymous user's Opinion**
Not being able to swim is a problem since I need it for my hip therapy. Hoping pools can open up at some point this summer.
-  **Anonymous user's Opinion**
None
-  **Anonymous user's Opinion**
I know that people in government are trying to give out information in manageable doses and there are some things that just aren't known right now, but I would really love to know more about childcare options for the summer so I can plan how to work. Specifically, I would love to know if Eagle Zone will be open.

- Anonymous user's Opinion**
The biggest problem by far is that I have been self employed for 3 years. Obviously I pay my taxes like everyone else. Although I SHOULD receive unemployment I was denied (a long with a minimal of 25 people I know from my industry). They say I didn't make any money last year so I filled it out wrong. Okay they say they need proof of income BUT never say what that is. Many people self employed don't have paycheck stubs. So what do i need to show...tax returns..bank account? Needless to say I have been trying for 3 plus weeks and the unemployment office literally has no one answering the phone. I finally called the state representative yesterday. So we will see. This is a tough time to say the least and I/we will push through. It is sad and extremely dangerous to essentially ignore self employed people. But of course they will be banging on my door when the taxes are due. And as we know in Eden Prairie it will be just a matter of time when they need another referendum or bond bill passed. I think we have a total of 4 right now we pay on. Maybe we can have another vote in May for the next referendum/bond vote. You know the time of the year NO ONE votes. Fix the referendum/bonds process like the EP school board did last time. We WILL all get through this but us in the private sector and self employed are going to have to get back to work so we can pay for all this stuff. Stay safe and keep the faith.
-  **Kari Ann OBrien's Opinion**
school and church direct help for emotional stability.
-  **Anonymous user's Opinion**
online schooling with Kindergardener is nearly impossible while working from home
-  **Anonymous user's Opinion**
My father, who is 90, lives alone in a condo near Hennepin Technical School. I am concerned that people in his building may not be informed and/or practicing current health measures such as social distancing. Also concerned that if someone in his building has COVID-19, other residents will not be informed. Questions concerning children in our house and employment income are not applicable so that should be an option as an answer.

I wish drug stores would operate on a drive-thru only basis, since they appear to be a significant source of community spread. Don't think there's anything local government can do about that, though. Walgreens, for example, is dropping the ball on their PPE and protection response. The EP liquor stores feel safer.

-  **Anonymous user's Opinion**
You can ignore our Question 1 responses, because we aren't currently living in EP, but I wanted to fill this out because we bought a house in EP this month and are planning to move into it in July. The pandemic is affecting the move in some significant ways. In particular, we were unable to come out to get work started on the property last week as we'd originally planned, and it looks like we won't be able to be there in person until July now. We are also very nervous about driving our family across state lines on a multi-day trip while keeping them safe, particularly because some of the state we would normally drive through aren't doing any stay-at-home or other protection factors. In addition, my middle kid will be a junior in EPHS, and I don't know how the weirdness of the end of this school year will effect his credits nor his orientation at the new high school. We are watching the EP news updates, and are very grateful for all the information you're sharing with residents. :)
-  **Anonymous user's Opinion**
Eden Prairie Schools should NOT be trying to recreate an entire school day, everyday with distance learning. It's too much and too stressful
-  **Anonymous user's Opinion**

We should start opening some bussiness like dog grooming, shoes repair, small retails with low trafic, restaurants with limited amount of people inside etc.
-  **Anonymous user's Opinion**
We own a business and customers can't pay due to state wide stay at home order
-  **Anonymous user's Opinion**
The uncertainty of the immediate future is a bit unnerving. If nothing gets worse (for me, personally) employment wise, I can work a budget around it, but it is tight (major auto repairs or a medical emergency during this time could result in a personal financial crisis. A larger reduction in hours at work is a possibility that worries me. Outside of financial worries, my emotional and physical health are satisfactory, at the moment. I live alone so spreading while isolated is not a concern.

**Anonymous user's Opinion**

I am an essential worker so my husband has been home with 3 of our children and struggling to work and supervise school during the day. We have had to leave one shield in preschool in order for this to have any chance at success. It means increasing our families exposure through my work and day care when we have an immune compromised individual in the house.

**Anonymous user's Opinion**

Not being able to go to parks, get outside, see relatives is difficult. The main way we get our energy out is with the Community Center Pool or LifeTime Fitness.

**Anonymous user's Opinion**

Elderly family members outside of EP are really struggling & we can't visit them

**Anonymous user's Opinion**

I feel like a caged bird. not being able to go out and socialize but understand the limitations. Hope this crisis is over soon. I feel bad for the families who have lost loved ones to COVID-19

**Anonymous user's Opinion**

Living. Alone, even with social connection it's still very lonely not being able to get out and be around people.

**Anonymous user's Opinion**

Very concerned about the economy and the family future due to the economy

**Anonymous user's Opinion**

Cannot get masks, lack of testing

**Anonymous user's Opinion**

Just trying to get through this and stay safe. Appreciate everything the city and state has been doing for their residents.

**Anonymous user's Opinion**

My husband and I work in a restaurant and we both are on furlough, I feel that the mayor problem is financial ,but grateful that the senator took the right preventive actions

**Anonymous user's Opinion**

For all our investment in technology we should have been more prepared for online learning. It should not have taken our educators 2 weeks to prepare for how to do online learning. Its great that all students have technology tools to accomplish learning in an online environment, however this is useless if the curriculum and systems are not in place or poorly administered to take advantage of the new environment.

**Anonymous user's Opinion**

Neighbors not being neighborly.

Anonymous user's Opinion

It sounds like with this questionnaire you are only interested in hearing from families and not us live-alone elders but I'm answering this anyhow. I am retired and consider myself one of the lucky ones. My mortgage is paid off, I receive social security and also have income from my 401k. My biggest concern is I am in the high risk group because I am over 65 and have asthma. I order groceries from Cub for pick-up but sometimes still have to go into the store because some of the items I want I can't find on their web site. Also they are so busy you have to put in your grocery order 5-6 days in advance. For prescriptions I go through Walgreens pick-up window so I don't have to go into the store. It would be nice to have the company of another person once in awhile but I'm making do with emails, the phone and voices on TV. For exercise I have a treadmill which I try to use every day. I'm concerned for us high risk elders who have things like asthma because I think for us we could be in this for the long haul. I know if I get this virus I'm done for.

**Anonymous user's Opinion**

None at this time

Anonymous user's Opinion

My family is frustrated because we feel like the means to the end doesn't match! There is such a low death rate. At first it was ok, take it slow, we were more than willing to stay home when there were so many unknowns. BUT now, there isn't one model that has been accurate. They estimated millions could die, than hundreds of thousands, and now the entire country is at 50000K. We are ruining our economy for a bunch of what if's. The media is causing so much fear that our own neighbors are turning against each other. Is no one concerned that in a matter of a week our media was able to SHUT DOWN our nation? Shut it down! I'm afraid and more people should be questioning it. There is NO transparency and everyone keeps changing their end game. Hospitals aren't ready, slow the infection rate until hospitals are ready, DID that, and we are laying OFF hospital workers because there aren't enough sick people. We need 5000 tests a day, DID that! Not enough, more excuses! Kids can't go back to school - why? Because like 5 kids in the NATION have gotten sick and died? COME on people -- I'm not willing to watch my finances dissipate because of this. We need to open our state up and allow those who are at risk to stay home. We are hurting ourselves by keeping everyone wrapped up at home. When you open people are going to get sick just because our immune systems have lowered by staying home. Frustrations are HIGH!

**Anonymous user's Opinion**

No issues at this time.

**Anonymous user's Opinion**

Job loss, school stress, no data and numbers don't add up for this lick down at this point. Against our constitution

Anonymous user's Opinion

Long lines at bank drive-thru, not being able to communicate with creditors, businesses, and govt. Agencies because of jammed phone lines and wait times of 60, 120, and even 380 minutes. Confusion and contradictory guidelines from govt agencies, cdc, etc. Poorly executed govt. aid programs for small businesses. Paying too much unemployment benefits, giving employees no reason or motivation to return to work, or find interim employment. Excluding higher income tax payers with ss# from stimulus money because their spouses work under an ITIN, not a ss#. Attempting to filer the important information from the garbage is becoming a full time job.

**Anonymous user's Opinion**

Not enough school work for the second grader

Can't help elderly parents not living with me, lack of technology for them

**Anonymous user's Opinion**

It is difficult to get the exercise my kids need with parks closed

**Anonymous user's Opinion**

Open the playgrounds again!

**Anonymous user's Opinion**

Not being able to see family and grandkids

**Anonymous user's Opinion**

My husband is now unemployed and it is near impossible to find a job.

**Anonymous user's Opinion**

Doing fine but it would be great to be tested to see if we had the virus because multiple trips to NYC in Feb and March were followed by possible symptoms. My wife was told it was bronchitis but no one was talking Covid 19 at the end of February.

**Anonymous user's Opinion**

Not significant compared to other people.

**Anonymous user's Opinion**

We need more testing and antibody testing. I don't really know if we had the virus or something else!

**Anonymous user's Opinion**

I work in the technology sector and am greatly insulated from direct financial or isolation impact. I am concerned about the profound impact to some members of society as a whole that are part of the service industry. I am interested in helping in ways that observe safety and provide assistance where needed.

**Anonymous user's Opinion**

Although unpleasant and worried for all- our household has so much to be grateful for. 2 generations under one roof. We have each other:-)).

**Anonymous user's Opinion**

Mostly loss of income and being self employed and not able to get unemployment. Lack of supplies in the store. Also having an immunocompromised child in my household, it is scary to go out to get supplies or even have things ordered here. It is frustrating when the general public blows this off as nothing and puts my child at risk by not being careful. It is isolating and not good for mental health to be stuck home and alone.

**Anonymous user's Opinion**

Not feeling able to travel to places is frustrating.

**Anonymous user's Opinion**

Space in home for people to be home all the time. Child home from college.

Anonymous user's Opinion

I miss getting together with my friends, going out to eat. However, things could be a lot worse, and I am grateful my problems are so minimal.

Anonymous user's Opinion

The HOA of the neighborhood in which I live (Staring Lake area) is still tagging cars and threatening to tow for exceeding the 24 hour rule. I live in an area with lots of townhomes that has parking spots here and there and street parking. The HOA has said the rule is so that guests can park. That in and of itself is ridiculous considering members of the community who pay the HOA fee are not prioritized. Anyway, the fact that they are still tagging cars for exceeding that rule during a quarantine/stay at home order, is absolutely ridiculous. It seems contrary to encouraging community safety and instead encouraging people to be outside and moving their cars everyday.

Anonymous user's Opinion

Lack of cleaning supplies due to hoarding.

Anonymous user's Opinion

Being unable to meet with neighbors, friend, associates, etc., and the loss of church, community and local venues to gather together is a huge loss.

Anonymous user's Opinion

Both parents are working, with reduced pay, and we are trying to get our work done as well as helping our children complete their school work. Typically we have spent 75% of our time helping our children.

Anonymous user's Opinion

No work hours, self-employed - no govt \$ yet, high school and college children - no stimulus \$, remote learning is unsuitable and not working for their personal needs of a traditional classroom, no paycheck means hard to pay mortgage, put food on table, pay bills, etc., we need to get the economy going again, certain age groups and people are at risk, the rest of us need to get back to work to get the economy going again. 1/10 of my income has been lost for the year. Will be hard to make up if things don't start opening up. Loving the family time and slow down and I hope things don't go back to the rat race. Also loving no traffic times... Need to have positives first!

Depression. Weight gain. U

Anonymous user's Opinion

boredom- cannot move my husband May 1 to a memory care facility as planned due to CDC rules about quarantine and no visitors - we both are disappointed at the interruption of our plans

Anonymous user's Opinion

Our rental complex is having an issue with people creating more trash because we're all home more often. The trash company won't pick up anything that won't fit in the bins, and will not do extra pick ups or large item pick ups. The complex we live in has said it's not their responsibility to help us dispose of the extra trash and that we must contact the trash company. But, the trash company has already said they aren't accepting drop offs or doing extra pick ups. Since trash is part of our lease, I think the rental company of the complex has some responsibility to help us solve the problem of extra trash building up. If people start storing extra trash in their garages it will cause bugs and rodents once it gets warmer.

Anonymous user's Opinion

I live alone with my children. When I go out for food, I have to bring my children because of their age. I need masks for us. I had some when this all started, but I'm out now.

Anonymous user's Opinion

Finding daycare for my child before 5/4 to prevent losing my job

Anonymous user's Opinion

Unable to find any disinfectant products anywhere, shelves are bare at every store, even Amazon is totally sold out. What is happening? How am I going to keep myself safe?

Anonymous user's Opinion

N/A

Anonymous user's Opinion

Eden Prairie using a 3rd party to conduct polling where they require personal information. Could have just used survey monkey or survey gizmo. Would have been cheaper and protected residents personal information.

Anonymous user's Opinion

Compared to most people, my family doesn't have problems. We have inconveniences. Most of it is driven by an inability to socialize with friends, go to restaurants, etc.

Anonymous user's Opinion

For the most part we are OK.

Anonymous user's Opinion

Not clear on what you can and cannot do - for example, is it ok to have people come do work on your home inside or in your yard, exercise if social distancing?

Anonymous user's Opinion

Struggling with distance learning. It is getting easier. Kids go to CMS & EHSI. But still missing friends. And basic class interaction. Keeping them on track is tough with a toddler. Sure wish the Parks were open!

Anonymous user's Opinion

Anxiety and depression is up which leads to no exercise and crappy eating. Working on seeing psychiatrist and trying to eat better and walk.

**Anonymous user's Opinion**

I am 70 years old, retired and living alone. My biggest problem is the isolation from my family and friends. I am struggling with depression and health issues as I had a stroke last September and my knee needs surgery. The loneliness is almost more than I can bear.

**Anonymous user's Opinion**

Lack of access to a swimming pool

**Anonymous user's Opinion**

Nothing to report

**Anonymous user's Opinion**

No other problems at this time. Very blessed.

**Anonymous user's Opinion**

Listening to others who don't think they need to stay at home or not visit family and friends. Frustrating!

**Anonymous user's Opinion**

Looking forward to warm dry weather enabling more park walks (with social spacing).

**Anonymous user's Opinion**

working outside the home as an essential worker with human contact has added a layer of stress. Along with knowing a coworker who chose not to work and is earning more money through unemployment than she did at our job with no risk to herself.

**Anonymous user's Opinion**

Getting toilet paper has been a challenge. We are grateful to instacart and shipt for deliveries.

**Anonymous user's Opinion**

It's very difficult not being able to see other people face to face. I'm tired of staring at people through a screen all day long for work and then socially too. It's hard working in my make shift kitchen office as a professional. It's challenging to have consistency and structure when I didn't choose to work from home. But yet I'm grateful to have a job where I can work from home. It's just more challenging as I started said job in January.

**Anonymous user's Opinion**

Not able to see my doctor and afraid to schedule medical exams

**Anonymous user's Opinion**

Social distancing is not being practiced as well as it should be on walking paths in the city parks. I suspect that some people don't actually understand how far 6 feet is. You should paint stripes and/or 6 foot wide arrows on the walking paths to remind people of what 6 feet actually is.

**Anonymous user's Opinion**

Please reopen all the pickleball courts

**Anonymous user's Opinion**

Not sure if we should use childcare facilities during this pandemic.

**Anonymous user's Opinion**

Struggling to educate our students virtually.

**Anonymous user's Opinion**

For some of the questions I am writing good or not a problem because currently we are okay but I have been notified recently that I am having a lay reduction of 2/3 my hours so I may feel more stressed and feel more financial crunch as time goes on

**Anonymous user's Opinion**

i'm getting to the point where I think expectations are unrealistic. We need to accept that we won't all avoid getting this - we've just put it off so we won't overwhelm the healthcare system. Now it's time to start figuring out how to open back up, to allow people to be exposed slowly, figuring out how best to protect the most vulnerable among us while we do so.

**Anonymous user's Opinion**

No

**Anonymous user's Opinion**

Nightmares

**Anonymous user's Opinion**

I was unemployed prior to pandemic and it has slowed down the job hunt. Unemployment benefits have ended.

Socializing with people and anxiety on the end date of lockdown. A little bit stress to restrict kids with in the home.
-  **Anonymous user's Opinion**
No
-  **Anonymous user's Opinion**
Our immediate household is fine but we worry about friends and relatives.
-  **Anonymous user's Opinion**
We are feeling fortunate right now
-  **Anonymous user's Opinion**
I am furious about the overreach of government and the use of faulty models. We need to stop the tyranny and start getting back to normal!
-  **Anonymous user's Opinion**
CDC advises people wear face coverings while in places like grocery stores because face coverings and cloth masks could prevent people who are unknowingly contagious from spreading COVID-19. This is a way we show we care more for each other rather than our own comfort. Messaging like this by our city council could do a lot to help reduce spread of COVID by promoting it.
-  **Anonymous user's Opinion**
N/a
-  **Anonymous user's Opinion**
Fear for our economy and structure of government. Need to open NOW, with controls for a bit. Metro areas last, but out-state now!
-  **Anonymous user's Opinion**
Not being able to "gather" is the biggest issue for us. And although I CAN get to the grocery store, the apprehension about the wisdom of being there and bringing the purchases into our home is on our mind.
-  **Anonymous user's Opinion**
Not at this time, but we look forward to being able to get out from stay-at-home order.
-  **Anonymous user's Opinion**
I am independent contractor and my income has been affected by COVID-19. Supposedly, I am covered under the new CARES act but I continue to get denied employment benefits. I have been told that they are working on it through the congressman's office but have not received any similar communication through the unemployment office. Not confident that I will be covered and it is very scary.
-  **Anonymous user's Opinion**
Wanting to support our neighbors but not knowing how to provide that support. We have one family with a wife/mother who has cancer, another family who has a wife/mother at HCMC for trying to take her own life, and another wife/mother who contracted COVID-19, all in our single cup-de-sac. As people, we want to reach out, provide help, provide food, provide essentials but how can we do that through social distancing and when we're struggling to obtain essential items for our own household? It's a bit disheartening
- Anonymous user's Opinion**

-  My wife and I are falling behind with our jobs because our kids require a lot of help with distance learning.
-  **Anonymous user's Opinion**
I am working short hours, I can't pay my bills
-  **Anonymous user's Opinion**
Not knowing if I would lose my job due to the pandemic is a major concern.
-  **Anonymous user's Opinion**
Loss of income , no unemployment yet causing household stress
-  **Anonymous user's Opinion**
Were seeing more school grade children outside a lot during the weekdays from 8am to 3pm, while our high school student is very busy in her classes each day. Only suggesting that maybe monitoring by their parents or have school officials or police monitor the neighborhood more during this pandemic.
-  **Anonymous user's Opinion**
Our community needs to get back to work. Enough quarantine.
-  **Anonymous user's Opinion**
The unknown!
-  **Anonymous user's Opinion**
I exercise at Starring Lake daily. Every day I encounter groups/family's walking three and four people abreast on the path. Even though I'm on the far right side of the path, oncoming walkers/joggers come well within a foot of me. This is not 6ft social distancing.
-  **Anonymous user's Opinion**
Job hours increased dramatically
-  **Anonymous user's Opinion**
USE OF THE LIBRARY
-  **Anonymous user's Opinion**
Not a problem really as much as a concern. We are only outside of our yard to walk the dog but every time we go past Franlo park, it is full of groups who are not socially distancing. Some may be family members from the same household but most look like teenagers or adult groups. I don't know what the solution there is but it's frustrating that some people are taking precautions and some are not which will prolong things for everyone.
-  **Anonymous user's Opinion**
Juggling young children with both of us trying to work is impossible. Playgrounds being closed, malls being closed, lack of options for young children For education and socialization isn't sustainable long-term. We've spent 6 weeks following the guidelines but I don't think we'll be able to continue them into summer, fall, and/or potentially 2021 like the Governor was discussing at this weeks press conference. Kids can't live like this long-term.
-  **Anonymous user's Opinion**
Local city officials are being too overly careful. We need to open businesses back up, with distancing guidelines, so our local economy does not disappear.
-  **Anonymous user's Opinion**
No
-  **Anonymous user's Opinion**
How to watch school age children if summer programs are cancelled

-  **Anonymous user's Opinion**
Still see people at the parks and trails not practicing social distancing (tennis courts, basketball courts, soccer fields, baseball fields).
-  **Anonymous user's Opinion**
Many people not following social distancing recommendations on walks and at local park (Franlo).
-  **Anonymous user's Opinion**
n/a
-  **Anonymous user's Opinion**
Challenges that existed before the pandemic are now amplified. My husband was cut to part time teaching status in the fall, and planning to look for a job to support our family of 4 kids this summer. I am working for a non profit which is struggling to provide pay checks for much longer. At this rate, the fear is we will not find enough work to support our bills, and lose our home. Neither my husband or I have health insurance, nor can we afford it. (Our kids are on MA.) Financial stress and fear of the future is the most challenging. Schooling our kids and keeping up with that also adds to the strain. We hope to utilize any resources available in our community to sustain us.
-  **Anonymous user's Opinion**
I have a lot of technical skill sets but I don't know how I can help match my skills up with current community need.
-  **Anonymous user's Opinion**
We are fine and feel very lucky. Many thanks to everyone that has delivered goods to our home. We couldn't do this without you.
-  **Anonymous user's Opinion**
One household member is still required to work (as an essential worker) and that creates stress.
-  **Anonymous user's Opinion**
Poor physical health- working without ergonomic set-up (no office chair, desk, etc), aggravated back issues, little opportunity to stretch when working around the clock online, assisting in homework, toddler, and cooking 24/7.
-  **Anonymous user's Opinion**
If things continue the way they are I will likely be laid off (already took a salary cut).
-  **Anonymous user's Opinion**
I need to be looking for a job, but I am 71 have heart disease (had bypass surgery) and diabetes
-  **Anonymous user's Opinion**
As a self employed person, the promised unemployment is still a mess and not received. Trying to be patient. Very frustrated with trying to get exercise or walk the dog outside and seeing children and adults in group activities, ignoring the social distancing orders. Or, children (old enough to read) playing on playground equipment that is clearly marked "closed".
-  **Anonymous user's Opinion**
People are not following stay-at-home orders as anticipated. Not following social distance at stores. This needs to be addressed sooner than later.
-  **Anonymous user's Opinion**
none
-  **Anonymous user's Opinion**
Lack of secondary income is the biggest issue.
-  **Anonymous user's Opinion**

-  **Anonymous user's Opinion**
My son had to go into the hospital and I could not advocate for him as I wasn't allowed in.
- Sarah E Johnson's Opinion**

Unemployed & unable to find a job these days

Anonymous user's Opinion

Emotional health is drastically becoming a problem

Anonymous user's Opinion

I worry about my son, who is the front lines at L&B, but they are taking all reasonable measures for the safety of their employees and customers.

Anonymous user's Opinion

There is a significant portion of the population who are not following distancing/mask usage guidelines and are in fact questioning them publicly.

Anonymous user's Opinion

Yes - government and media's campaign of panic.

Anonymous user's Opinion

Majority of support from federal gov appears to be going to big companies rather than people

Anonymous user's Opinion

1. Getting groceries requires a lot more effort (=items not available, wearing mask, planning for trip, etc.) and is frustrating 2. People not wearing masks freaks me out - at Target Chaska, about 75% of shoppers weren't wearing any mask. They're walking around as if everything is normal.

Anonymous user's Opinion

Unconstitutional government overreach ruining the economy

Anonymous user's Opinion

My son lost his job on 3/13 and still has not been approved for UI

Anonymous user's Opinion

Lack of reliable information, not knowing where to get reliable information.

Anonymous user's Opinion

The whole idea of a lockdown is media driven hysteria. 95% of the deaths are people 60 and older and most of them are in elder care facilities. Keep everyone else at home is ridiculous.

Anonymous user's Opinion

none

Anonymous user's Opinion

END THE LOCKDOWN!

Anonymous user's Opinion

.

Anonymous user's Opinion

The district cancelling the Early Childhood education program (Little Eagles) is really upsetting, and it makes me feel my son in that program is now at a disadvantage compared to students in neighbouring cities' pre-K program.

Anonymous user's Opinion

We aren't sure if the president has any plans for this kind but we have a very strong message to help or to make a decision about the future and how we will work any longer than any of us or other people who have been involved with this investigation.

Anonymous user's Opinion

Frustration with the slow process of the state reopening - people are smart enough to understand how to social distance and handle themselves. It is time to get things on a track to business as usual.

Anonymous user's Opinion

I'm still waiting on the stimulus check.

Anonymous user's Opinion

I believe I may have had COVID-19 In March and would like an antibody test. The only available option I've found costs \$185 through a private testing lab. I'd be interested in hearing when testing will be available to the general population of EP. It would certainly help us with safely opening more small businesses.

How would you rate your household on the following:
